

Introduction to Discover & MapInfo Professional Course

WHO SHOULD ATTEND:

A two day introductory course for geologists, geoscientists, cartographers and engineers with little or no knowledge of Discover or MapInfo Professional desktop GIS mapping software.

DESCRIPTION: Introduction to Discover & MapInfo Professional Course

The course will begin with an overview of the basic MapInfo Professional user interface, opening and displaying different types of GIS data, making data selection and queries through to editing and creating new data. A must for anyone who wants to learn the basics of computer mapping in a relaxed and friendly atmosphere.

This course will cover the following modules:

- MapInfo Professional/Discover User Interface
- Tables and Workspaces/Projections
- Layer Control
- Opening and Importing Data
- Selecting and Querying Data
- Creating and Editing Data
- Map Making
- Thematic Mapping

VENUE: Darwin Computer Academy - Training Centre
Suite 2, 2 Shepherd Street
DARWIN NT 0800
